**~A real nice guy**

*Determination and skills to create anything...*

## *Overview*

I have been doing lighting for film and television for nearly 5 years. I have rigged 4k HMI's 10' off the side of 3<sup>rd</sup> story buildings, laid enough dolly track that you could implement a new LA mass transit system, and spent many hours climbing through the rafters and ceilings of locations to rig up lights. In addition to my experience doing lighting, I am also an extremely experienced Director of Photography, camera operator, and producer. I have an eye for the smallest of details and I am a perfectionist. I am an artist that paints with light and I look forward to working on your projects.
